We herewith declare that the **Levitronix® Puro Fan PFS-i06** in its configurations as listed below, is in conformity with the above mentioned *European Directives* and *UK Statutory Instruments*. The bearingless fan is designed to be used in industrial production machines and equipment containing ventilation circuits. Typical applications are semiconductor and chemical manufacturing equipment.

Part Name	Description
PFS-i06.x	Bearingless fan PFS-i06.x (x = various configurations, e.g. motor cable, connectors)
FIP-2.x	Accessory: Levitronix Interface Panel for PFS-i06.x

Machinery Directive 2006/42/EU – Machinery Regulation SI 2008 Nr. 1597:

The machinery directive essentially has been followed by a risk analysis, according to mitigation actions and a user manual for safe operation. For the design and testing the following standards are used as a guideline:

ISO 12100 Safety for machinery – principles for risk assessments: used for system risk analysis.

EMC Directive 2014/30/EU – EMC Regulation SI 2016 Nr. 1091:

The following standards of the EMC directive are tested and confirmed at a certified laboratory:

EN 61000-6-2 Generic standards – Immunity for industrial environments
 EN 61000-6-4 Generic standards – Emission standard for industrial environments
